Paradiso 3 Cocoa And Oil Palm Cultivation Brochure

For Paradiso 3 Subscribers

This initiative offers an opportunity to maximize your land investment through participation in a structured plantation program focused on two high-value cash crops — cocoa and oil palm.

Added Benefit

Paradiso 3 Cocoa And Oil Palm Subscribers Are Also Eligible For Tomato, Pepper And Sweet Potato Cultivation So As To Benefit From Both Long Term And Short Term Cultivations

Cultivation Model

Cocoa And Oil Palm - Plantations Will Be Concentrated On Your Allotted Plot/Acres

Tomato, Pepper, Sweet Potato - Plantations Are Concentrated On Company Reserved Area

Oil Palm Plantation Breakdown

Oil palm is one of Nigeria's most valuable agricultural assets, with strong demand across the food, manufacturing, and export sectors. Through the Paradiso Farm Long Term Plantation Scheme, landowners can participate in a structured oil palm cultivation program designed to create long-term value and sustainable agricultural returns.

The Available Planting Timelines

2026

July - September

2027

March - September

Roadmap For Setup & Management

01

Land Clearing & Site Preparation

Clear vegetation, map and demarcate the land, and create access paths.

02

Seedling Procurement & Nursery

Procure certified seedlings and establish a healthy nursery.

03

Field Layout & Planting Design

Plan spacing, mark planting points, and prepare the soil.

04

Transplanting & Plantation Establishment

Transplant seedlings to the field, water, and apply mulch and protection.

05

Maintenance & Crop Management

Control weeds, apply fertilizers, manage pests and diseases, and monitor regularly.

06

Growth Monitoring & Development

Assess growth performance, fill gaps, and ensure plantation health.

07

Harvest & Value Realization

Harvest fruits, value addition, process and distribute

Oil Palm Land Cost, Setup & First Year Management Fee

Per Plot

N1,000,000

Per Acre

N6,000,000

*Planting Period/timeline is subject to payment completion date

Annual Maintenance Schedule

Maintenance Activity	Frequency
Weeding, Pruning, Shade Management And Gap Filling	2 Per Year
Fertilizer Application	Once A Year
Herbicide Spraying	Once A Year
Pest & Disease Inspection	Monthly
Drainage Maintenance	Monthly
General Supervision & Logistics	Monthly

Oil Palm Yield Projection

This Is To Show A Potential Harvest Yield

PER PLOT

Crop Performance	Trees Per Plot	Bunches/Trees/Year	Bunches/Tree/Plot/Year
Below Expectation	10	8-10 Bunches	80-100 Bunches
Expected	10	10--15 Bunches	100-150 Bunches
Above Expectation	10	15-20 Bunches	150 - 200 Bunches

PER ACRE

Crop Performance	Trees Per Acre	Bunches/Trees/Year	Bunches/Tree/Acre/ Year
Below Expectation	70	8-10 Bunches	560 -700 Bunches
Expected	70	10--15 Bunches	700 - 1050 Bunches
Above Expectation	70	15-20 Bunches	1050 -1400 Bunches

Plant Spacing - 8m X 8m

Oil Palm Harvest Fruiting & Harvest Timeline

First Fruiting

4th Year after planting

Lifespan

30-50 years (It could be more)

Agrolocale Value Addition Plan

Before The First Fruiting, Agrolocale Will Take The Initiative Of Investing In An Oil Mill On The Site, Which Would Be Used In Processing The Harvest From The Plantation

Cocoa Plantation Breakdown

Our Cocoa Plantation Scheme offers a unique opportunity to invest in one of the world's most valuable cash crops. Professionally managed from planting to harvest, it combines sustainable agriculture with long-term growth potential. Participate in a thriving industry driven by strong global demand for cocoa.

The Available Planting Timelines

2026

July - September

2027

March - September , 2027

Roadmap For Setup & Management

01

Land Clearing & Site Preparation

Clear vegetation, survey the land, and create access paths for plantation activities.

02

Seedling Procurement & Nursery

Source certified cocoa seedlings and establish a healthy nursery system.

03

Field Layout & Planting Design

Mark planting points, prepare the soil, and establish recommended spacing.

04

Transplanting & Plantation Establishment

Transfer seedlings to the field and provide shade, mulching, and early care.

05

Maintenance & Crop Management

Manage weeds, apply fertilizers, control pests and diseases, and monitor growth.

06

Growth Monitoring & Tree Development

Track plantation performance, replace weak seedlings, and support healthy tree development.

07

Harvesting & Post-Harvest Processing

Harvest ripe cocoa pods, ferment and dry beans, and prepare for market distribution.

Cocoa Land Cost, Setup & First Year Management Fee

Per Plot	N1,000,000
Per Acre	N6,000,000

*Planting Period/timeline is subject to payment completion date

Annual Maintenance Schedule

Maintenance Activity	Frequency
Weeding, Pruning, Shade Management And Gap Filling	2 Per Year
